

January 14, 1993 LB 2, 3

CLERK: 30 ayes, 0 nays, Mr. President, on the advancement of LB 2.

SENATOR KRISTENSEN: Thank you. LB 2 is advanced. Next on the agenda is LB 3. Mr. Clerk.

CLERK: LB 3, Mr. President, introduced by Senator Warner. (Read title.) The bill was introduced on January 7, referred directly to General File.

SENATOR KRISTENSEN: Thank you, Mr. Clerk. Senator Baack, for opening.

SPEAKER BAACK: Yes, Mr. Chairman, and colleagues, on LB 3, last year, as you know, we passed legislation which renamed the Department of Environmental Control as the Department of Environmental Quality. And as they went through all of the statutes relating to the Department of Environmental Quality and changing those names, they found that there were a certain number of sections which were obsolete. This bill would actually repeal six of the statutes that are obsolete. The date they were...what they are is they were to develop and publish a report on the solid waste disposal in the State of Nebraska and they were supposed to finish the study by January 1, 1988 and publish the report and give a report to the Legislature by March 1, 1988. Since these dates have passed, these sections are now obsolete and we have precluded all of these things with LB 1257. So, with that, I would just ask for the adoption of LB 3.

SENATOR KRISTENSEN: Thank you, Senator Baack. Is there any discussion on LB 3? Seeing none, Senator Baack for closing. Oh, excuse me, we do have Senator Preister.

SENATOR PREISTER: Honorable President and distinguished members, I just want to be sure that in this there is only language changes and no substantive changes as this is something new for me with these Revisor bills and I believe the Speaker did mention it was only language and not substantive and I would just like to clarify that for my own information. Thank you.

SENATOR KRISTENSEN: Thank you, Senator Preister. Any other discussion? Seeing none, Senator Baack for closing.
